PAGE 1 – COMPLAINT FOR MEDICAL NEGLIGENCE

IN THE CIRCUIT COURT OF THE STATE OF OREGON

FOR THE COUNTY OF MULTNOMAH

KAREN J. WEST

Plaintiff,

VS.

KAISER FOUNDATION HOSPITAL, NORTHWEST PERMANENTE, P.C., KAISER FOUNDATION HEALTH PLAN OF THE NORTHWEST, AND JAMES MICHAEL KONIECZNY, DPM,

Defendants.

Plaintiff alleges:

Case No.

COMPLAINT FOR MEDICA NEGLIGENCE

Claim for 6,000,000

ORS 21.160(1)(6)

CLAIMS NOT SUBJECT TO MANDATORY ARBITRATION

At all times mentioned herein, Kaiser Foundation Hospital is and was a California corporation authorized to transact business within the state of Oregon. Northwest Permanente, P.C., was and is an Oregon corporation authorized to transact business within the state of Oregon. Kaiser Foundation Health Plan of the Northwest is and was an Oregon corporation. Defendants Kaiser Foundation Hospital, Northwest Permanente, P.C., and Kaiser Foundation Health Plan of the Northwest (hereinafter referred to as "Kaiser") provided hospitals, doctors, medical staff and medical facilities to the general public and to the Plaintiff. James Michael Konieczny, DPM, was a Doctor of Podiatric Medicine, licensed to practice podiatric medicine within the State of Oregon and held himself out to Plaintiff and the general public as having

special skill, training and experience in the treatment and diagnosis of foot injuries, foot disease, foot tumors and foot disorders. Defendant Konieczny was an agent and employee of the Defendant corporations and was acting within the course and scope of his employment.

2.

On or about September 16, 2011, Plaintiff Karen J. West, age 26, sought care and treatment from the Defendants and specifically from Defendant Konieczny, for evaluation of a mass in the arch of her right foot. She had been referred to Defendant Konieczny by her primary care physician, Michael P. Grace. The foot was tender while walking on uneven ground. She could not wear an arch in a shoe, could not walk barefoot on beach or grass, or walk on flat ground without pain. On examination, Defendant Konieczny noted a 30 x 30 ml mildly fluctuant soft tissue mass with a 10 x 6 ml medial extension of the mass that was tender to the touch. The mass was painful to pressure. Defendant Konieczny recommended an MRI to determine the etiology of the mass.

An MRI of the mass of Plaintiff's right foot was undertaken on October 21, 2011. The MRI resulted in the reporting of an abnormal enhancing lobulated area extending from the plantar fascia, extending between the flexor digitorum brevis and quadratus plantae muscle, possibly representing unusual appearance of plantar fibromatosis. However, due to the linear extension of mass between the muscles and its proximity next to the neurovascular bundle, a nerve sheath tumor was not entirely excluded. The radiologist reported the findings may be related to plantar fibromatosis requiring clinical correlation. The report was filed by Defendants in the medical chart of Plaintiff.

Huegli Fraser P.C. 101 SW Main, Suite 1900 Portland, OR 97204 Tel: (971) 266-8877 / Fax: (971) 277-6970 appointment, did not notify the Plaintiff either by telephone or in writing of the results of the

MRI, and did not see the Plaintiff again. No further action was taken by the Defendants in any

respect to assist the Plaintiff in diagnosing the nature, extent, nor severity of the mass in her right

Defendant Konieczny did not provide clinical correlation, did not schedule a follow up

foot.

5.

Plaintiff called Defendant Konieczny and Defendant Kaiser's Department of Podiatry numerous times requesting the results of the MRI, but received no return telephone calls.

6.

On May 30, 2012, Plaintiff saw Dr. Thomas W. Harbison, her primary care physician, complaining of the same problems that she had six months earlier. Plaintiff requested a biopsy of the lump and a referral to Podiatry once again, as she had not received any return calls from Dr. Konieczny. No Podiatry referral was made.

7.

Subsequent to May 30, 2012, Plaintiff called Defendant Kaiser requesting additional care and referrals, but received no return calls.

8.

On December 23, 2013, Plaintiff once again requested a copy of the MRI report from Dr. Konieczny and was told to contact the imaging department if she wanted to see the report.

9.

On January 29, 2014, Plaintiff was referred to Dr. David Arndt for a second opinion regarding the mass in her right foot. Dr. Arndt immediately concluded that the mass was not PAGE 3 – COMPLAINT FOR MEDICAL

NEGLIGENCE

25 26

consistent with plantar fibromatosis and suggested a repeat MRI and biopsy. A repeat MRI and biopsy were undertaken, which reflected that the tumor had grown significantly and was now invading the tendons, ligaments, muscles, facia and nerves of the right foot of the Plaintiff. The tumor was diagnosed as a hemosiderotic fibrolipomatous tumor and not plantar fibromatosis.

10.

On or about June 12, 2014, excision of the tumor in the right foot was undertaken with full thickness skin grafts. At surgery, the tumor went deeply into the subcutaneous tissues and around the flexor musculature. The mass extended down to the neurovascular bundle and although the main lateral plantar nerve was not transected, smaller branches of the nerve were involved with the tumor. Due to the size and invasive nature of the tumor, clear margins were not possible, and the full tumor could not be removed without destroying the ability of the foot to function.

The conduct of the Defendants was negligent and fell below the standard of care of a reasonable and prudent physician and surgeon in the following particulars:

- In failing to timely notify Plaintiff that the MRI on October 21, 2011 was grossly abnormal and needed further evaluation;
- b) (In failing to timely refer the Plaintiff to a physician and surgeon who had the skill, training and experience necessary to remove the tumor;
- c) In failing to warn the Plaintiff that the grossly abnormal tumor was not, in fact, a plantar fibromatosis, but may very well have been a more invasive and aggressive tumor such as a hemosiderotic fibrolipomatous tumor;

- d) In failing to biopsy the tumor in view of a grossly abnormal MRI. A biopsy would have demonstrated that the tumor was, in fact, a hemosiderotic fibrolipomatous tumor;
- e) In failing to return numerous telephone calls placed by the Plaintiff to the Defendants which would have resulted in Plaintiff's knowledge and understanding of the disease process in her foot;
- f) In failing to remove the tumor from the Plaintiff's right foot when the tumor was of a size and character that could have been removed, leaving Plaintiff with no permanent disability or injury;
- g) In failing to timely diagnose a hemosiderotic fibrolipomatous tumor. A timely diagnosis would have allowed complete excision and removal of the tumor to prevent recurrence.

∕112.

As a result of the negligence of the Defendants as alleged above, the tumor in the Plaintiff's right foot grew into and around the muscles, ligaments, tendons and nerves of the Plaintiff's right foot and became impossible to remove from the right foot with clean margins. Because of the failure and inability to remove the entire tumor, Plaintiff will suffer chronic and constant recurrence of the tumor in the future, will require additional invasive surgeries as the tumor continues to grow and spread, and will suffer, at some time in the future, amputation of her right foot, together with a reasonable chance that the tumor will become malignant and metastatic.

PAGE 6 – COMPLAINT FOR MEDICAL **NEGLIGENCE**

Plaintiff will require future medical care and treatment, including additional invasive surgeries, medical testing, regular and continued MRI evaluations, and additional reasonable and necessary medical expenses, all to her noneconomic damage in the amount of \$500,000. Plaintiff will further sustain a loss of earning capacity, in an amount to be proven at the time of trial.

14.

As a result of the negligence of the Defendants, Plaint has sustained pain, suffering, disability, loss of self-esteem, depression, disfigurement, the probability of the loss of her right foot by amputation and interference with all aspects of her daily, social, work and family life, all to her noneconomic loss in the amount \$5,500,000.

WHEREFORE, Plaintiff prays for damages as follows:

- Economic damages in the amount of \$500,000;
- Noneconomic damages in the amount of \$5,500,000;
- Plaintiff's costs and disbursements incurred herein.

Dated this 27th day of May, 2015.
